

Investor Update

Mark Hooper - CEO & Managing Director

Jeff Sells – Chief Financial Officer

Gary Dunne – Chief Operating Officer

November 29th 2011

Outline

- 1. Sigma Strategy Mark Hooper
- 2. Financial Update Jeff Sells
- 3. Operational Progress Gary Dunne
- 4. Distribution Centre Tour
- 5. Refreshments

or personal

- Initial strategy signed off by Sigma Board in First Half
 2011
- Review of key outputs completed in October 2011 including
 - Assumptions around **future industry conditions** (including competitors)
 - Identification of Industry Critical Success Factors (CSFs)
 - Comparative SWOT analysis
 - Sigma Vision
 - Sigma Culture

or bersonal use

Strategy in Action

- The focus remains on our core Wholesaling and Retail operations
- In practice, this means:
 - Continually improving the core parts of our business (People and Performance, Logistics and Inventory Management, Customer Segmentation, Retail, Merchandising, Systems and Analysis)
 - Identifying opportunities to enhance business performance
 - To build a cultural platform that delivers a sustained strong performance
- An innovative Retail offering is a critical component of this

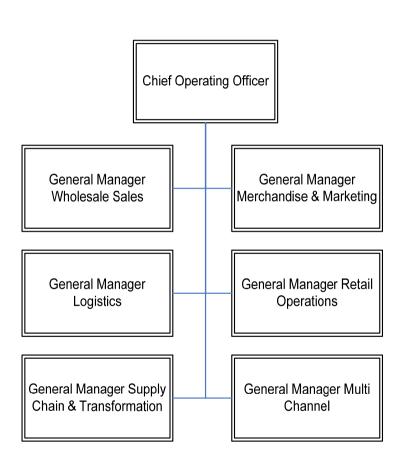

People and Culture

- The roles and responsibilities of the Executive Management team have been expanded and restructured to support and reflect our new strategy, culture and vision.
- "The way we do things at Sigma" has been reinvigorated and redesigned with an emphasis on embedding our cultural vision.

Operations Re-Structure

- Chief Operating Officer
 - Gary Dunne appointed in July 2011
 - Extensive experience and knowledge in retail operations including Coles, Woolworths, Aldi and more recently at RedGroup and Clive Peeters
- Oversees an integrated team with unified goals and customer focus

Industry Outlook

- Met the challenges from Pfizer exclusive model and initial impact from 2010 reforms
- Further challenges ahead
 - PBS reform (April 2012 and ongoing)
 - minimum of 23% cut in over 180 molecules from April 2012
 - may lead to no PBS growth in 2012 or potentially slightly negative
 - may require further adjustments to customer discounts
- Still some potential for expansion of exclusive supply arrangements
 - Pfizer move has caused considerable disruption within Pharmacy
 - any increase in exclusive supply arrangements may require further review of current service arrangements

- 2 key events coincide around April
 - 1) Pfizer's Lipitor comes off patent Positive
 - no impact from 16% price reduction because Sigma does not distribute
 Pfizer products
 - additional sales of new generic versions (expected February to June)
 - 2) 23% minimum price disclosure Negative
 - generic drugs not yet subject to price disclosure will be subject to 23% minimum price cut from April
 - Impacts approximately 30% of Sigma's PBS sales
 - take measures to offset financial and inventory impact
- Other price changes Negative
 - Other price disclosure cycles impact in April, August and December
 - Estimated that >\$450m of total PBS pool (excluding Lipitor) will be subject to 16% price reduction over 2012

or bersonal use

Summary

- Sigma continues to rebuild. H1FY12 performance reflected market share gains and first steps in rebuilding process
- Now implementing strategic phase focusing on organisation's culture, people and systems. Steady progress
- Results for the second half have continued to be solid, however, there are a number of challenges through to year end and into 2012:
 - preparing for impact of PBS reform in 2012
 - potential for other suppliers to go for an exclusive supply model
 - changes in the competitive landscape
- Having a stronger business puts us in good shape to deal with these issues, however there remains potential for customer terms / service levels to be affected by the first two issues

Financial Update

Jeff Sells

Tuesday 29th November 2011

H1 2012 Income Statement Summary

A\$m	2012 H1	2011 H1*	Change
Revenue	1372.3	1406.5	-34.2
EBIT	38.0	24.5	13.5
Net Financing Costs	2.0	-37.7	39.7
Tax Expense/benefit	-12.1	4.0	-16.1
NPAT	27.9	-9.2	37.1
Discontinued Operations	-1.2	-201.9	200.7
Net profit/(loss) for Sigma Group	26.7	-211.1	237.8

First half had some benefit from one off gains (approx \$4m)

- Not repeated in second half
- Not expecting any significant one offs in H2
 2012

^{*2011} H1 figures have been adjusted to reflect reclassification of some revenue streams and Retail income previously shown as part of the Pharma results and restatement of a number of inventory and promotional transactions

Second Half Trading Update

- H2 2012 sales and gross profit trading in line with expectations
- H2 2012 will benefit from full 6 months contribution from PAL/IPAG and seasonality effect
- Not expecting any other significant market share gains – some swings and roundabouts
- Operating costs broadly in line with expectations
- Planning now for operational efficiencies for next year
- Capital expenditure likely to be between \$8m-\$9m for full year, FY12

or personal

H2 2012 Cash Flow

- H1 2012 produced strong operational cash flow of \$106m
 - Function of seasonal factors and improvements in DSO
- Historically, H2 is weaker in cash flow due to year end inventory build/strong December sales
 - H2 2012 will follow similar pattern, plus \$17m dividend payment in this half year
 - Capex of around \$5m for Rowville upgrade
- Continuing focus to leverage all aspects of working capital

Operational Progress

Gary Dunne

Tuesday 29th November 2011
